

# Recharging Your EarthScout® Battery

L-Series Outdoor and A-Series Indoor Models

**Step 1:** Release clips on side of gray box and open door. Loosen velcro strap holding battery in place, or if your unit has a holding bar, move the gray bar to the right. Remove battery from housing (Diag. 1.1).

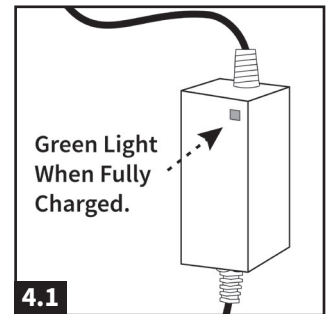

**Step 3:** Take the battery and insert the top of the battery with the metal clips into the blue box head first. Be sure the metal clips on the battery align with the metal clips in the bottom of the box for a proper charge.

**Step 2:** Take the three parts of the battery charger and plug the power cord into the bottom port of the black adapter (Diag. 2.1). Then plug the adapter into the blue charger box.

**Step 4:** Light on charger is red when battery is charging and green when fully charged (Diag. 4.1). May take several hours to charge. Reinstall battery to EarthScout when charging is complete.

We understand the importance of having a strong support network for our customers. If at anytime you need assistance, please call 877-443-7632. We want you to be 100% satisfied with your EarthScout.
